

It appears you have shared a resume and a job posting for a co-op position at Vale Base Metals. Here are some key points about Gurmanpreet Kaur's background: * Gurmanpreet is a third-year Chemical Engineering Technology student at Sheridan College. * She has experience as a retail associate and is also a passionate perfume development enthusiast, with skills in formulation, blending, and essential oil extraction. * Gurmanpreet has strong analytical skills, proficiency in using analytical instruments, and experience with process control and instrumentation. * She is proficient in using Microsoft Suite, Visio, ChemDraw, and AutoCAD. As for the job posting at Vale Base Metals, here are some key points: * The company is a global mining company seeking Engineering Students for fixed-term co-op positions (4-12 months) in Sudbury, ON. * The roles involve providing technical support to enable safe and efficient operations in an industrial plant, mine, or production laboratory. * The ideal candidate should be currently enrolled and in good standing in an Engineering University program (Electrical, Mechanical, Civil/Structural). * The company offers competitive compensation, opportunities for career growth, and a work culture dedicated to safety, diversity, and inclusion. It seems that Gurmanpreet Kaur may be a qualified candidate for this co-op position, as she has a background in chemical engineering and analytical skills that align with the job requirements. However, I recommend reviewing the job posting carefully to see how Gurmanpreet's skills and experience match the position.
